

Interim DNS Delegation Plan

- IANA will manage IPv6 reverse space
 - Should ultimately move to ICAO controlled infrastructure
- Designated Expert to co-ordinate delegation requests & interactions between IANA and ICAO
- 14-bit mapped into part of allocated IPv6 space
 - Per-country basis using ISO 3166(?) numeric codes
- Need an ICAO PoC for verifying delegation requests with NAAs
 - Ensures NAA is fully aware, delegations go to authorised national contact
