Chairs
The goal of this BOF is to demonstrate that the community has agreement that:

- there is a problem that needs solving, and the IETF is the right group to attempt solving it.
- there is a critical mass of participants willing to work on the problem (e.g., write drafts, review drafts, etc.).
- the scope of the problem is well defined and understood, that is, people generally understand what the WG will work on (and what it won't) and what its actual deliverables will be.
- there is agreement that the specific deliverables (i.e., proposed documents) are the right set.
- it is believed that the WG has a reasonable probability of having success (i.e., in completing the deliverables in its charter in a timely fashion).
