

draft-ietf-iotops-security-  
summary-01

# Changes in v01

- Added mapping from ETSI Cyber Security for Consumer Internet of Things: Baseline Requirements
- Surprising result:
  - Several requirements did not already have equivalents.

# ETSI Requirements

- Substantial overlap with ENISA / NIST
- More focus on Consumer IoT devices
- Extensive requirements for Update
- More resilience requirements
- Substantial data protection requirements

# Status of v01

- Currently incorporates:
  - NIST IoT Device Cybersecurity Capability Core Baseline
  - ETSI Cyber Security for Consumer Internet of Things: Baseline Requirements
  - ENISA Baseline Security Recommendations for IoT in the context of Critical Information Infrastructures
- What's left to do?
  - Additional requirement mappings?
  - Probably some wording changes

# Question to the Working Group

- What else does this draft need?
- Are there any others who want to work on this?
