

Guidance on End-to-end E-mail Security and Header Protection

Daniel Kahn Gillmor <dkg@fifthhorseman.net>

IETF 118

LAMPS session

November 2023

draft-ietf-lamps-header-protection-17

- Changes since IETF 117 (draft -15):
 - More textual cleanup from post-WGLC feedback
 - Correct a variable name
 - Still in **MISREF state**, waiting on **e2e-mail-guidance**

draft-ietf-lamps-e2e-mail-guidance-12

- Good feedback from WCLC
- Changes since IETF 117 (draft -10):
 - Mention List-* and Archived-at header fields
 - Improve references to papers that describe flaws
 - More nuance about split attachments and proxy design
 - Clarify caveats about external subresources in text/html parts

Requests to WG

The authors think both documents are ready to advance

“Future Work” section of e2e-mail-guidance is calling...
