suffixes: Changes since IETF 117

- [-06 draft](#) ([diff-marked copy](#))
- Update suffix registration template
    - To require links to specifications instead of free-form text in columns
- Update IANA Considerations
    - To change Suffixes registry from "Expert Review" to "Specification Required"
- Require change controller consent for base subtypes
    - application/foo... base subtype controller must consent to application/foo+baz registration
    - Proof must be provided during registration to Designated Expert

suffixes: Changes since IETF 117

- Clarify processing order of multiple structured suffixes
  - Left-to-right (most specific to least specific)
  - Skip structured suffixes that are not registered
  - If processing multiple suffixes, SHOULD stop processing on (en|de)code error
- Allow registration of media types w/o all suffixes registered
  - Allow "application/vc+ld+json+jwt without "+ld+json+jwt"/"+json+jwt" being registered
- Final editorial updates across entire spec

suffixes: Remaining issues

- No remaining issues (AFAICT)
    - Anything else that's not in the issue tracker?

IETF 118: mediaman-suffixes

- Who has reviewed any version of the draft / provided input?
  - Harald Alvestrand, Amanda Baber, Martin J. Dürst, Ivan Herman, Graham Klyne, Murray S. Kucherawy, Darrel Miller, Mark Nottingham, Roberto Polli, Orie Steele, and Ted Thibodeau Jr.
- Who supports going to WG Last Call at this time?
  - Should we call for consensus to enter WGLC?
