

A YANG Data Model for Interface Reference Topology

draft-ietf-ccamp-if-ref-topo-yang

<https://github.com/ietf-ccamp-wg/draft-ietf-ccamp-if-ref-topo-yang>

J. Ahlberg (Ericsson)

S. Mansfield (Ericsson) - presenting

M. YE (Huawei)

I. Busi (Huawei)

D. Spreafico (Nokia)

X. Li (NEC)

Status

- Interface Reference Topology YANG Module used to be part of the Microwave Topology YANG Draft
- The ability to point from a termination point in a topology to the Interface management information is a generic feature that could be used by more than just Microwave, so at a previous IETF meeting this module was split out into its own I-D.
- Upon further reflection, progressing this work in NETMOD might be more appropriate.
- Github: <https://github.com/ietf-ccamp-wg/draft-ietf-ccamp-if-ref-topo-yang>
- Draft: <https://datatracker.ietf.org/doc/draft-ietf-ccamp-if-ref-topo-yang/>

Plan

- So -- the authors of the draft are asking for feedback to determine the best place to progress the draft.
- Find the proper home for the draft.
