

QUIC BDP Frame Extension

draft-kuhn-quic-bdpframe-extension

Nicolas Kuhn (Thales Alenia Space)

Emile Stephan (Orange)

Gorry Fairhurst (University of Aberdeen)

Christian Huitema (Private Octopus Inc.)

BDP Frame

Careful Resume (draft-ietf-tsvwg-careful-resume) allows fast startup

Can be used with QUIC

BDP Frame is a QUIC extension to extend Careful Resume

Enables client to participate in the "jump"

BDP Frame Protocol

BDP Frame Protocol

Client requests Use of BDP Frames

BDP_FRAME {
QUIC FrameType
Secure Hash
Lifetime
Saved CWND
Saved Min RTT
Endpoint Token
}

Enable BDP TP {
0..3
}

Save at Client

BDP Frame Protocol

Client requests Use of BDP Frames

```
Enable BDP TP {  
  0..3  
}
```

```
BDP_FRAME {  
  QUIC FrameType  
  Secure Hash  
  Lifetime  
  Saved CWND  
  Saved Min RTT  
  Endpoint Token  
}
```

Save at Client

```
BDP_FRAME {  
  QUIC FrameType  
  Secure Hash  
  Lifetime  
  Saved CWND  
  Saved Min RTT  
  Endpoint Token  
}
```

Update Client

BDP Frame Protocol

Client requests Use of BDP Frames

```
Enable BDP TP {
    0..3
}
```

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

Save at Client

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

Update Client

```
Secure Hash
Lifetime
Saved CWND
Saved Min RTT
Endpoint Token
```

BDP Frame Protocol

Client requests Use of BDP Frames

```
Enable BDP TP {
    0..3
}
```

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

Save at Client

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

Update Client

```
Secure Hash
Lifetime
Saved CWND
Saved Min RTT
Endpoint Token
```

Request Use of CR

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

BDP Frame Protocol

Client requests Use of BDP Frames

```
Enable BDP TP {
    0..3
}
```

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

Save at Client

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

Update Client

```
Secure Hash
Lifetime
Saved CWND
Saved Min RTT
Endpoint Token
```

Request Use of CR

Server validates BDP Frame

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

BDP Frame Protocol

Client requests Use of BDP Frames

```
Enable BDP TP {
    0..3
}
```

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

Save at Client

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

Update Client

Server validates BDP Frame

Request Use of CR

```
BDP_FRAME {
    QUIC FrameType
    Secure Hash
    Lifetime
    Saved CWND
    Saved Min RTT
    Endpoint Token
}
```

Use at Client

BDP Frame Receiver Usage

Receiver can read, but not modify, the BDP Frame

Allows receiver to say if CR is not wanted

- Understanding of path/interface changes
- Understand which flow for Careful Resume (can use once)
- Can tune the QUIC flow credit?
- Can tune apps to utilise capacity hints, e.g., DASH clients?
- etc

Next Steps...

We plan to revise the draft

Is there interest in developing the BDP Frame resume method in QUIC ?

Will the WG consider adoption of draft-kuhn-quic-bdpframe-extension ?

.... Questions

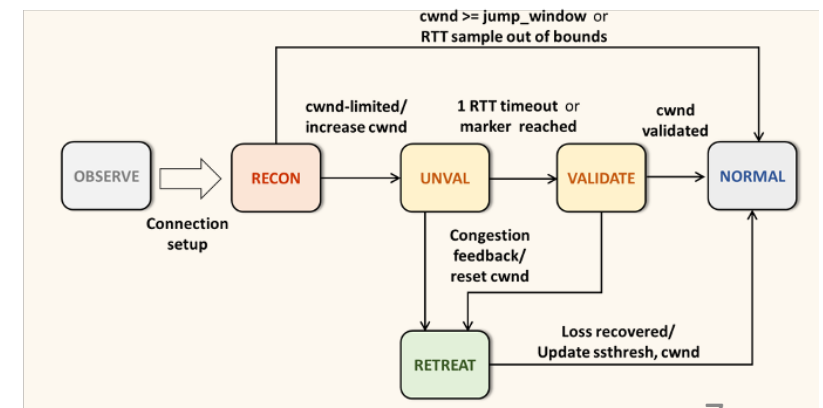

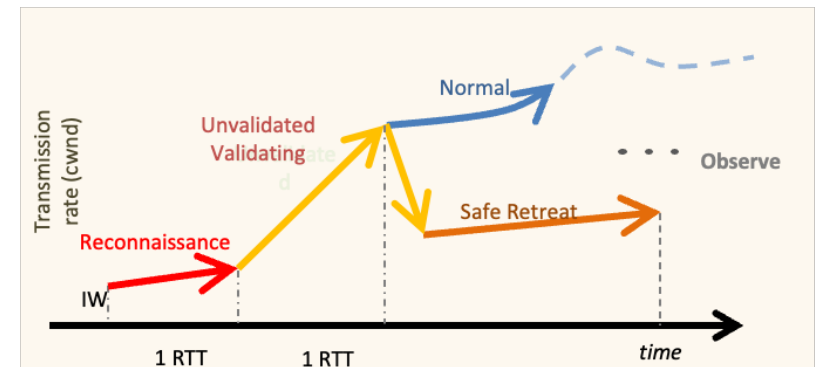

Additional material

Careful Resume Interaction

draft-ietf-tsvwg-careful-resume

- CR is a sender-side CC mechanism
- BDP Frame is a client/server protocol
- (Client enables BDP Frame)
- (BDP Frame sent to client - observe)
- (BDP Frame sent to server - recon)
- CR checks the path is similar (recon)
- Allows a large initial jump (unvalidated)
- Reacts if problems (safe retreat)
- Continues with normal CC

QUIC WG, IETF-118 , Prague, Nov 2023

Updates to draft-kuhn-quic-bdpframe-extension

Updates since last IETF meeting

-02 rewritten spec

- Moved to a simple design using only the BDP Frame
 - Revised language to align with CR draft
 - Capacity measured in bytes
-
- -03 Editor copy: Corrections and improvements
 - Revised to align with CR draft (after CR comments from Neil)
