RTG Area Working Group Agenda Items

The current issues with working group time

- Noticeable increase in documents on agendas that have had no discussion on the working group lists.
- In one case – a document that had no uploaded draft at agenda time publication on the list.
- Working Group in person time is limited and needs to be used efficiently to help move work forward.

Our proposal – for discussion

- Drafts should only be allowed on Agendas if they have had discussion on mailing lists prior to the working group agenda cutoff.
- Where working groups want external presentations from third parties that aren't drafts, the slides for these presentations should be sent to the working group within the same time frame.
- We would like to see this become policy across all working groups in the area so that there is a common position on this
- Let's discuss, we'd like to hear if there are any issues with this that we haven't yet seen.
