

Questions and Suggestions for the ASPA based verification draft

Rüdiger Volk

2023-11-10

need for serious review and rework

- title/terminology: VALIDation ./ VERIFIcation
- restructuring (e.g. collect and amend some text in an applicability section)
- Security Considerations certainly needs to be replaced by something solid!!!
(starts with very broad benefit claims with considerable hand waving, followed by very technical discussion of a probably incomplete set of extremely few of of vulnerable cases)
- ... for shortness and to avoid uproar we stay out of specifics here – some may get contentious
- rework may have consequences for other related drafts
(apologies to implementers)
