

# TLS 1.2 is still frozen

**Rich Salz, Nimrod Aviram**

# Content

- No new algorithms except for ALPN and key exporter labels
- Annotation that new ciphers, etc., are “For TLS 1.3 or later”
  - We need a new column in the registries ...
- Stated: *no* post-quantum (previously was implied)
- TLS only, not DTLS

# Impact on other protocols

As requested, split out and moved to separate draft intended for UTA

# Next steps

- Adoption by WG.
- Probably quickly ready for WGLC after people have read it.
  - It's short; TXT (skipping boilerplate) is 122 lines
  - TXT reference list is 123 lines
