IETF 119, March 2024
Brisbane

Welcome new co-authors

- Jorge and Win have joined as co-authors

Recap

- Presented in IETF-116 & IETF-117
- EVPN First Hop Security
 - DHCP snoop database sync between ES peers for multihomed hosts
 - DHCP snoop database sync with EVPN peers for mobility
 - Defines DHCP Sync Route
 - Address both bridge and IRB services

Changes in latest version

- We have outlined more details on Bridge and IRB services operations for multihomed and remote EVPN peers.
- Arranged sections to make it easy to read.
- Added more RFC and draft references.

Next Step

- Solicit more input on the mailing list
- Requesting WG adoption

Thank You!
