

# **jscontact**

**IETF 119, Calendaring Extensions (calext)**

# We are (as good as) done! 🎉

All documents entered AUTH48. We work on updating the I-Ds.

Changes since IETF 118:

- Allow Address without full address or components, e.g. allow it to only be geographic coordinates.
- Clarify that reserved properties in a JSContact object make that object invalid.
- Allow ALTID parameter for GRAMGENDER and PRONOUNS.

# Next Steps

Publish:

- RFC 9953: JSContact: A JSON Representation of Contact Data
- RFC 9954: vCard Format Extensions for JSContact
- RFC 9955: JSContact: Converting from and to vCard

totaling to 174 pages.
