

draft-ietf-dnsop-rfc8109bis: Initializing a DNS Resolver with Priming Queries

Paul Hoffman

(also Peter Koch and Matt Larson)

IETF 119, Brisbane

March 2024

Status

- WG Last Call started 2023-10-10, finished 2024-01-22
- Authors published -03 and then -04 a month ago
- Was submitted to IESG for publication
- Was pulled back from that status yesterday

Another round of discussion

- Some people are concerned that the document does not directly deal with the current status of root zone operations
 - Have said they will bring this to the list

Post-last-call comment from Willem

- Suggested wording to emphasize that address records are not signed
- Suggested wording that unsigned parts of the response can be altered
- No response on the list yet
