

IMAP MESSAGELIMIT extension

draft-ietf-extra-imap-messagelimit-08

Alexey Melnikov <alexey.melnikov@isode.com>

Arun Prakash Achuthan <arunprakash@myyahoo.com>

Vikram Nagulakonda <nvikram_imap@yahoo.com>

Luis Alves <luis.alves@lafaspot.com>

Changes since -07

- Properly register SAVELIMIT= and MESSAGELIMIT= capabilities with IANA

Status and Next Steps

- The document is in IETF LC
- Reply/address Barry Leiba's ArtArt review:
 - Clarify COPY behaviour - no partial failure
 - Clarify APPEND behaviour - no partial failure
 - Tolerance to unaware clients that exceed the MESSAGELIMIT

IMAP UIDONLY extension

draft-ietf-extra-imap-messagelimit-07

Alexey Melnikov <alexey.melnikov@isode.com>

Arun Prakash Achuthan <arunprakash@myyahoo.com>

Vikram Nagulakonda <nvikram_imap@yahoo.com>

Luis Alves <luis.alves@lafaspot.com>

Changes since -03

- Allow UID fetch item when UIDONLY is enabled (comment by Bron)
- Register UIDREQUIRED response code with IANA

Status and Next Steps

- The document is in IETF LC
- Need to fix an example with UIDREQUIRED which mistakenly use the OK tagged response instead of the BAD tagged response (thank you to Dave Cridland).
- Address Barry Leiba's ArtArt review suggestion: change "SHOULD include UIDREQUIRED" to "MUST include UIDREQUIRED". Any objections?
