

JMAP Guide for Migration and Data Portability

IETF 119

<https://datatracker.ietf.org/doc/draft-ietf-jmap-portability-guide/00/>

Changes

Not much

Its adopted!

Further Notes

Motivation: Bare minimum, even for “one-time migration” use (lower entry barrier)

Turns out: It is also interesting for “normal” server/client developers!

Got some feedback from developer after FOSDEM '24:

“Surprising how little of JMAP is required for the minimum version”

Side-note: Might also make sense to update implementation guide on jmap.io

Future Work

Actually not sure? Might be ready soon?
