

# PIM Join/ Prune Attributes for LISP Environments using Underlay Multicast

(draft-ietf-pim-jp-extensions-lisp-05)

PIM WG/ IETF-119 -Mar 2024

Vengada Prasad Govindan ([venggovi@cisco.com](mailto:venggovi@cisco.com))

Stig Venaas ([svenaas@cisco.com](mailto:svenaas@cisco.com))

# Updates since last revision (04->05)

- Addressed comments from the mailing list:
  - Clarified that the proposed draft updates RFC 8059
  - Most of the updates are in Sec 3 (Updates to RFC 8059 )
    - Added Sec 3.2 which specifies the updated format of the Receiver ETR RLOC Attribute.
    - Added Sec 3.3 which specifies the usage of the proposed attribute change with separate list of actions to be taken at the ITR and the ETR.
    - Clarified the scope of the proposal (Sec 3.1)

# Next Steps

- Any more comments from WGLC?
- Should we restart WGLC?
