Update

Status of the draft

- Draft is stable
- Multiple implementation of the draft via yang or proprietary PCEP is available and is live in the wild.
- Lot of interest in the SRv6 Replication SID to enable multicast in a SRv6 network.
- General feedback is
 - Marriage between multicast and unicast via replication SID (multicast domain) and SID list or SR Policy (Unicast domain) is an attractive way to solve the end-to-end multicast dilemma

What is next

- Comments and suggestion are welcome
- Requesting last call to trigger comment and wrap up the draft.

Thank You!
