

draft-ietf-suit-report-08

ietf 119

Brendan Moran

Summary of changes since v07

- Added capability report
 - Previously included in draft but not included in draft
- Added generic “failure reasons”
 - Intended to be sufficient for logging without exposing too much detail
 - Generic classes of failure type

suit-report failure reasons

- cbor-parse: CBOR parser returned an error
- cose-unsupported: unsupported structure or header
- alg-unsupported: unsupported COSE algorithm
- unauthorised: Signature/MAC verification failed or had insufficient privileges
- command-unsupported
- component-unsupported
- component-unauthorized
- parameter-unsupported
- severing-unsupported
- condition-failed: A condition check failed with soft-failure off (outside of try-each)
- operation-failed: A suit directive failed

suit-report status
