# Scope & Status

- Addresses the concerns raised about possible rate-imbalance in shared-queue RFC3168 bottlenecks
  - Guidance for Operators of End-hosts, Operators of Networks, Researchers
- WG agreed to keep it as a living document to capture experiences and knowledge gained during initial L4S deployment experiments
  - WG milestone: Submit as Informational RFC – November 2024
- No new contributions recently. Last substantive changes made in 2021. Ready for WGLC?
