

draft-lear-bcp83- replacement (and similar)

Eliot Lear, Rob Wilton, John Levine, Bron Gondwana

IETF 120

Problem Statement

- Sometimes people say things they shouldn't
- BCP83 provides a very heavy weight process when action is needed
 - With no flexibility
 - Requires a public review
 - Is demeaning to all parties involved
 - Requires excessive amounts of community resources

Goals

- Provide a flexible mechanism that-
 - Enforces IETF code of behavior
 - Preserves the dignity of individuals involved
 - Imposes **least** restrictions necessary
 - Limits costs to the community (and especially the IESG)
 - Enables timely and flexible response
 - Provides appropriate levels of transparency, privacy, appeals

Two drafts

- draft-ecahc-moderation
 - Covers all IETF participation channels
 - Establishes a global moderation team modelled on RFC 9245 moderators
 - They propose/establish a process to meet the goals
 - {More work needed}
- draft-lear-bcp83-replacement
 - Targeted toward plenary lists (ietf, last-call, non-WG/non-area lists)
 - Delegates to the IETF Executive Director
 - Specifies transparency, appeals, and broad authority
 - {More work needed}

Next Steps (we think)

- There's already a mailing list: mod-discuss@ietf.org
- Lay out key differences between the drafts
- Agree on goals and scope
- Take best from both works, or mix in something else
- Do this in a working group, so...
 - Establish a charter and...

Get On With It
