IETF

Suffixes: Changes since IETF 119

- -08 draft (diff-marked copy)
- Multiple plus signs in media types are now NOT ALLOWED
- IANA requested updated instructions in design review, which will be included in the next draft
- Everything else remains the same

suffixes: No Multi-plus Rationale

- We have failed to achieve consensus on having multiple plus signs in a structured suffix.
- Adding text has led to more debate, not less.
- Working Groups at W3C pursuing multiple plus signs needed to move on and have registered media types that do not use multiple plus signs or structured suffixes.
- Newest approach does not allow multiple plus signs; it's clean and seems to be something we could get consensus on (no objections yet).

IETF 118: mediaman-suffixes

- Who has reviewed any version of the draft / provided input?
  - Harald Alvestrand, Amanda Baber, Martin J. Dürst, Ivan Herman, Graham Klyne, Murray S. Kucherawy, Darrel Miller, Mark Nottingham, Roberto Polli, Orie Steele, and Ted Thibodeau Jr.

- Are we ready to go to WG Last Call at this time?
