

# MLS Extensions

IETF 120

Raphael Robert, Konrad Kohbrok, Rohan Mahy

# PRs

## Merged

- ExtensionState: Anchor extension-specific state in an MLS group to ensure agreement and manage state access authorization across extensions.

## Open

- Group context extension update proposal: not discussed yet
- Add safe use of AAD to Safe Extensions framework: discussed, details are missing

✨ *New draft after discussion of open PRs* ✨
