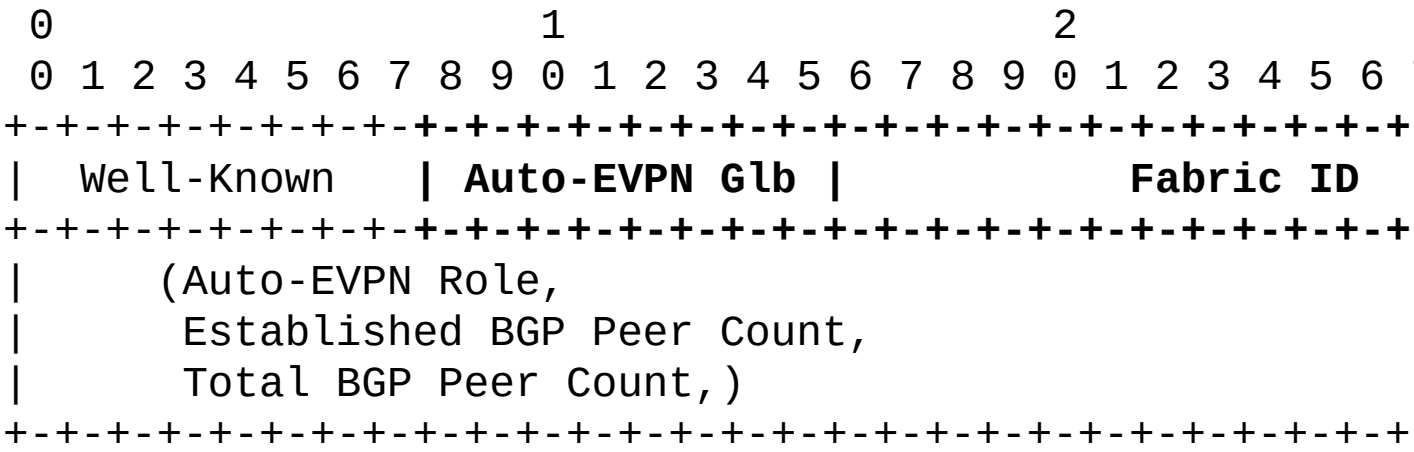
What’s new in version 06?

- **Terminology**
  - The previous version attempted to use EVI and MAC-VRF interchangeably in some areas. We adjusted to EVI where necessary to avoid confusion.
  - This had no functional or normative impact.

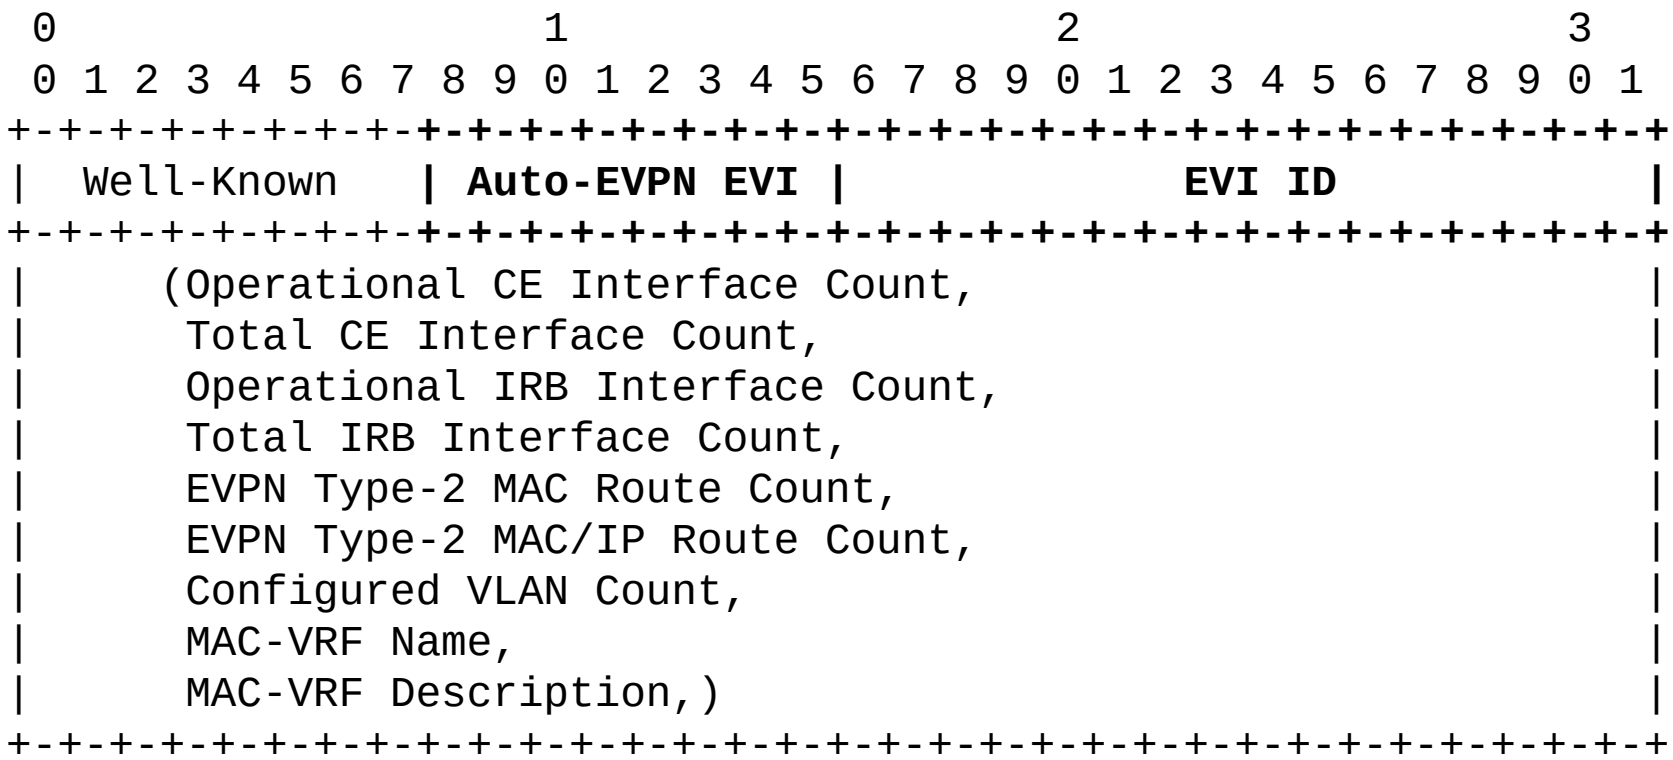
What’s new in version 06?

- **Auto-EVPN Global Key/Value Pair**
  - Incorporated the Key Sub-Type



What’s new in version 06?

- **Auto-EVPN EVI Key/Value Pair**
  - Incorporated the Key Sub-Type



What’s new in version 06?

- **IANA**
  - Registry requests updated to reflect use of Key Sub-Type also.

- **References, etc.**
