

Comments on ALDR in CDE draft

Laurence Lundblade, November 4, 2024

Applicability

Eliminate

- No history of profile or rules schemes proposals
- Little need in 13 years since RFC 7049
- Preferred serialization & CDE have worked well
- No eCBOR, fCBOR,...
- Designers & implementors need to read everything or the risk mistakes. Less to read is better.

Broaden

- Rename to Application Level Representation Rules, ALRR
- Useful to introduce concepts of *exclusions* and *reductions*
- Use cases might arise
