

# Conditional Attributes for Constrained RESTful Environments

draft-ietf-core-conditional-attributes

(<https://github.com/core-wg/conditional-attributes>)

Bill Silverajan

IETF 121 Core WG Meeting

# Current Status: Version -08 (and –latest)

- Diffs to Version -07 are mostly editorial and clarifications
  - > Draft being updated this week in (-latest) to address the rest of the review comments
  - > In –latest, additional clarification was added towards server processing of conditional attributes
- Early Review from the IoT Directorate given for version -06
  - > 1 review comment remaining, connected to IANA considerations
- Feedback from IANA to clarify registration procedures for the requested Conditional Attributes registry in Section 6

# Remaining Issues

- Work on IANA considerations section
  - Feedback from IANA to clarify registration procedures for the requested Conditional Attributes registry
  - 1 Early Review from the IoT Directorate given for version -06
  - 1 Review comment from Marco Tiloca for clarifying registration procedures and policy
- Editorial changes:
  - Change sequence diagrams to AASVG
  - Reposition and “no-number” Acknowledgments and Contributor Sections

# Conditional Attributes for Constrained RESTful Environments

Thank you!
