

Domain Control Validation with DNS

Shivan Kaul Sahib , Shumon Huque, Paul Wouters, Erik Nygren

Nov 4th, 2024

DNS Operations Working Group

Internet Engineering Task Force (IETF) 121 Meeting

Current version: 06

- Versioned draft:
 - <https://datatracker.ietf.org/doc/html/draft-ietf-dnsop-domain-verification-techniques-06>
- Datatracker link:
 - <https://datatracker.ietf.org/doc/draft-ietf-dnsop-domain-verification-techniques/>

Summary of changes since -05

- Use “owner name” instead of “domain name” in appropriate contexts
- Handling of mismatching records in the RRset
- Clarify handling for string boundaries in the TXT records
- Owner names of CNAMEs MUST always start with underscore
- Clean up Security Considerations section

Next?

- Clean up security section a bit more
- Finish responding to SecDir feedback
- Proposal from Ben Schwartz to add a “Purpose of DCV” section
- ???
- WGLC

Future: separate draft (if WG interest) on NS DCV for DNS Zones
