Meetecho Lite

There is a version of Meetecho for mobile devices called “Meetecho Lite”.

When you physically enter a meeting room, there will be a QR code to scan with your mobile device. This will enter you into the Meetecho room. This allows for you to enter the meeting queue and also records you as attending the meeting.

The QR code looks something like this but it is different for every meeting.

Meetecho Lite

Choose meeting and click on the phone button
