

draft-ietf-grow-bgpops-034

Keeping it short(er).

Tobias Fiebig¹

¹Max-Planck Institut für Informatik

Nick Hilliard²

²INEX

The plan from IETF119120

Focus should be on:

- Short enough for policymakers to read
- Generic enough to be resilient to specific technology changing
- Testable independent of implementation
- Published quick enough to prevent harm (more months than years)

Split out individual eggs from the current draft basket:

- ✓ Keep the core of the document that focuses on timeless truth about BGP security (purpose/goals/high-level), which can replace BCP194 as a BCP
 - ✓ An informational document listing 'the basket of eggs' that is there in terms of what can be done to secure BGP
 - ✓ An informational document reporting terminology 'as used in drafts around the time of writing'
- × **Be. Quick; Before things become laws.<<< !!!!!**

Changes since -013

- Minor formulation things
- Added preliminary references to E-Ds (Eternal-Drafts)

Eternal-Drafts (E-D)

[I]t does not detail how the outlined properties and security requirements can be implemented and enforced in practice. This is a conscious choice given that available techniques and methods to ensure these properties will change over time, while the underlying principles remain the same.

Instead, readers **MAY** refer to the most recent non expired draft of I-D.draft-fiebig-grow-routing-ops-sec-inform for an updated list of currently available technology to ensure the above principles, and the most recent non expired draft of I-D.draft-fiebig-grow-routing-ops-terms for information on currently used terms and definitions in the context of global routing operations. Readers **MUST NOT** rely on expired versions of these I-Ds.

If no most recent non-expired version of either I-D is available, the document **MUST** be considered to be non-existent.

Next steps

- Get I-D.draft-fiebig-grow-routing-ops-sec-inform and I-D.draft-fiebig-grow-routing-ops-terms adopted
- Do some editorial polishing
- ... ?
