Documentation for Palimpsest

Documents

File: draft-hallam...psest-00.xml

Format:

Document Name:

Description:

Process Traces

- HTTP
 - POST Request → Response
- Need
 - POST Request → BEGIN Response → COMPLETE Response
- More Generally
 - SUBSCRIBE Request [→ DATA Response]*

Transactions over QUIC?

- HTTP is designed for Web browsing
- Web Services use 5% of HTTP/2
 - Avoid port exhaustion (.well-known)
 - Framing
 - Firewall transition
- Want
 - Application level security
 - MAC per message
 - Flexible message patterns
 - MOQ already does much of this
