

# **Security Aspects of Key Identifiers on COSE/JOSE**

**<draft-tschofenig-jose-key-identifier-security-  
00>**

Hannes Tschofenig

# Status

- Presented to the group already under a different draft name:  
draft-tschofenig-jose-cose-guidance-00
- Call for adoption started.
- Feedback indicated that the scope is too large.
- Reduced scope and re-published draft.
- Here I am again!

# Content in a nutshell

- Emphasizes the importance of handling key identification within the header to simplify security processing and reduce risks.
- Key identification should be handled within the header to maintain a clear separation from the payload, simplifying security processing and reducing risks.
