In Last Call

- -06 Posted July 22, 2024
- Last Call started Aug 8, 2024
 - YangDoctor's last call review
 - Feedback on clock management
 - Three reviews with editorial comments
 - One partial review questioning the value of this document
- -07 Posted Oct 19, 2024
 - Author believes new version addresses all received comments
 - Clock management simplification, plus editorial updates

Changes from -06 to -07

- Removed recommendation about timestamps in the last-modified txid mechanism being similar to wall clock time.
- Removed two clumsily formulated sentences stating that clients **MUST NOT** infer temporal order from txid values.
- Added an example to highlight that the etag txid values can have different formats, and do not need to consist of strictly increasing integers
- Changed "monotonically increasing" to "strictly increasing"
- Added brief explanation that entitlements are sometimes also known as "licenses".
- Added introductory section on "How to Read this Document"
- Changed WG URLs in YANG modules to new datatracker format, e.g. <https://datatracker.ietf.org/wg/netconf/>
