

RATS: Evidence Carrying Protocols!

Why does RFC9334 not define a protocol?

Short answer:

it's an architecture to unify all **other** protocols

# What are those “other” Evidence protocols?

- TEEP

- ietf-teep-protocol-19
- aka “OTRPv2”

- YANG

- rats-tpm-charra

- CSR

- lamps-csr-attestation-11
- *ounsworth-rats-pkix-evidence*

## WHAT ELSE?

- TLS

- fossati-tls-attestation

# Where are Attestation Results carried?

- TEEP
    - ietf-teep-protocol-19
    - aka “OTRPv2”
  - ?
  - ?
  - ?
- WHAT ELSE?
