# Selective Disclosure for JWTs (SD-JWT)

Daniel Fett (Authlete), Kristina Yasuda (Keio University), Brian Campbell (Ping Identity)

# Tourists Beware

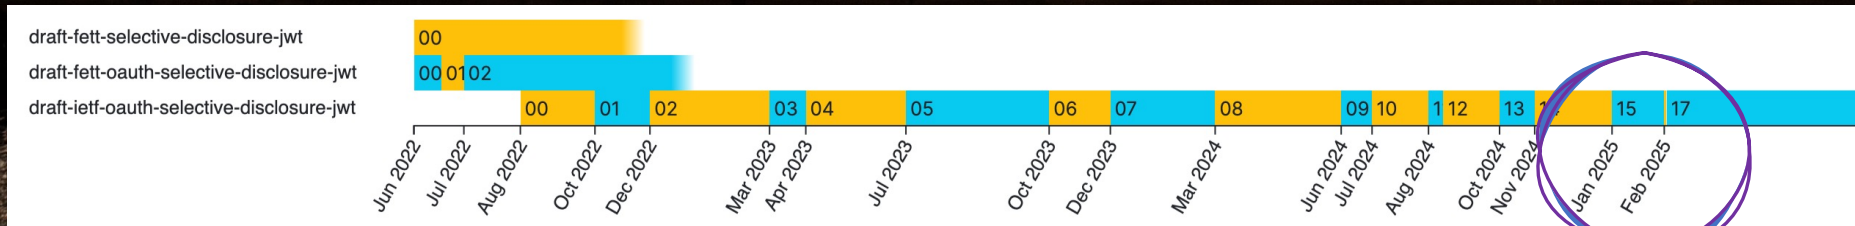

(Quick Overview/Refresher/Context)

## SD-JWT

A relatively simple salted-hash based mechanism facilitating the selective disclosure of individual elements of a JSON-encoded data structure used as the JWS payload. The primary use case is the selective disclosure of JWT claims.

# Since we last met

# IETF 121 in Dublin

# -15 (after 2<sup>nd</sup> WGCL)

- Additions and adjustments to privacy considerations
- Address AD review comments resulting from evaluation of formal appeal
- Clarify language around compromised/coerced verifiers

# Tryin' Real Hard To Be [Find] The [Document] Shepherd
