& Tommy Pauly**

# Note Well

This is a reminder of IETF policies in effect on various topics such as patents or code of conduct. It is only meant to point you in the right direction. Exceptions may apply. The IETF's patent policy and the definition of an IETF "contribution" and "participation" are set forth in BCP 79; please read it carefully.

As a reminder:

- By participating in the IETF, you agree to follow IETF processes and policies.
- If you are aware that any IETF contribution is covered by patents or patent applications that are owned or controlled by you or your sponsor, you must disclose that fact, or not participate in the discussion.
- As a participant in or attendee to any IETF activity you acknowledge that written, audio, video, and photographic records of meetings may be made public.
- Personal information that you provide to IETF will be handled in accordance with the IETF Privacy Statement.
- As a participant or attendee, you agree to work respectfully with other participants; please contact the ombudsteam (<https://www.ietf.org/contact/ombudsteam/>) if you have questions or concerns about this.

Definitive information is in the documents listed below and other IETF BCPs. For advice, please talk to WG chairs or ADs:

- [BCP 9](#) (Internet Standards Process)
- [BCP 25](#) (Working Group processes)
- [BCP 25](#) (Anti-Harassment Procedures)
- [BCP 54](#) (Code of Conduct)
- [BCP 78](#) (Copyright)
- [BCP 79](#) (Patents, Participation)

## **## HTTP Working Group Charter**

This Working Group is charged with maintaining and developing the core specifications for HTTP and generic extensions to it (i.e., those that are not specific to one application).

Beyond specification work, the Working Group is a forum for implementers, practitioners, and researchers to discuss the protocol, its operation and evolution, to improve interoperability and ecosystem health. However, the chairs may ask that some discussions be moved off-list to avoid interfering with specification work.

### **### Work Mode**

The Working Group may define extensions and other documents related to HTTP as work items, provided that:

- \* They are generic; i.e., not specific to one application using HTTP. Note that Web browsing by definition is a generic use;
- \* The Working Group Chairs judge that there is consensus to take on the item; and
- \* The Area Director is informed of the addition.

Work that may need substantial input from other areas (e.g., Security) should be coordinated through the appropriate bodies (such as the responsible Area Director or a general / 'dispatch' group).
