Ownership and licensing statements in YANG

draft-ietf-iotops-ol-00

Legally, MUD files are works
Works are owned
MUD files need to be licensed for use

```
module: ietf-ol

  augment /ietf-mud:mud:
    +--rw ol
       +--rw license* [owner-name]
          +--rw owner-name              string
          +--rw (license-type)?
             +--:(spdx-lt)
             |  +--rw spdx-tags*        string
             +--:(url)
                +--rw license-info*     inet:uri
```

Is this the right information?

Multiple licenses, each with owner identification and license types (using SPDX or URI)

```
+--rw license* [owner-name]
   +--rw owner-name                string
   +--rw (license-type)?
      +--:(spdx-lt)
      |  +--rw spdx-tags*          string
      +--:(url)
         +--rw license-info*       inet:uri
```

Is this the right way to put it in?

Using YANG Augment:

```
module: ietf-ol

  augment /ietf-mud:mud:
    +--rw ol
       +--rw license* [owner-name]
```

WGLC?
