draft-ietf-netmod-sub-intf-vlan-model

- Current status is "AD Evaluation::Revised I-D Needed”
- https://datatracker.ietf.org/doc/draft-ietf-netmod-sub-intf-vlan-model/
- https://github.com/netmod-wg/sub-intf-vlan-yang
- Updates Needed:
  - Several editorials
  - Make clear that YANG 1.1 used by the modules
  - Consider unknown-encaps as a statistic to be collected
  - Concern of "second-tag", but authors feel the name is appropriate considering there may be many tags and "second-tag" means the tag next to the outer-most tag.
  - Add a diagram describing the Ethernet Frame
  - Review YANG guidelines and update as appropriate

draft-ietf-netmod-intf-ext-yang

- Current status is “AD Evaluation::Revised I-D Needed”
- https://datatracker.ietf.org/doc/draft-ietf-netmod-intf-ext-yang/
- https://github.com/netmod-wg/interface-extensions-yang
- Updates Needed:
  - Several editorials
  - Definition of sub-interface clarification
  - Consider an example for forwarding-model
  - Fixing the json examples to remove unnecessary elements and fix addresses used to make the example more clear
  - Review YANG guidelines and update as appropriate

Next Steps

- Rob and Scott are working on updating both drafts
- New versions to be posted shortly after IETF 123

- Patience and Determination
