Update on draft-ietf-regext-rdap-jscontact

Mario Loffredo
Registro.IT/IIT-CNR

Version-21 ➔ jscontact-0.1

- Changed the controller of IANA registries from IESG to IETF.
- Replaced "rdap-x" with "rdap" in using the rdap-x media type.

Version-22 ➔ jscontact-0.2

- Following the shepherd’s feedback:
  - Added ips and autnums to the searchable resource types of the RDAP Reverse Search Mapping Registry.
- Following the publishing of draft-ietf-calext-jscontact-uid-00 :
  - Changed the JSContact version from "1.0" to "2.0“.
  - Removed any reference to the JSContact uid property.
- Following the publishing of draft-ietf-calext-jscontact-profiles-01:
  - Added a section about the registration of a JSContact profile for RDAP named “rdap”.
  - Removed any reference to those JSContact properties not included in the “rdap” profile.

Current status

- The document now includes 4 Normative References to ongoing drafts:
  - *draft-ietf-regext-rdap-versioning*
  - *draft-ietf-regext-rdap-x-media-type*
  - *draft-ietf-calext-jscontact-uid*
  - *draft-ietf-calext-jscontact-profiles*
- CalExt drafts have already started WGLC

Thanks for the attention!
