

ACME Profiles

draft-ietf-acme-profiles-01

Aaron Gable, Let's Encrypt
IETF 125, 2026-03-19

- Draft -01 created in early March
- The server SHOULD reject requests for profiles it is not advertising
 - Weakened from MUST, to allow private profiles

- Additional structure in profile listings?

Current:

```
"profiles": {  
  "profile1": "https://acme.ca/docs#profile1",  
  "profile2": "a different profile"  
}
```

- Additional structure in profile listings?

Current:

```
"profiles": {  
  "profile1": "https://acme.ca/docs#profile1",  
  "profile2": "a different profile"  
}
```

Proposal 1 (structured map values):

```
"profiles": {  
  "profile1": {"doc": "https://acme.ca/docs#profile1"},  
  "profile2": {"doc": "a different profile"}  
}
```

- Additional structure in profile listings?

Current:

```
"profiles": {  
  "profile1": "https://acme.ca/docs#profile1",  
  "profile2": "a different profile"  
}
```

Proposal 2 (structured array entries):

```
"profiles": [  
  {"name": "profile1", "doc": "https://acme.ca/docs#profile1"},  
  {"name": "profile2", "doc": "a different profile"}  
]
```

- Additional structure in profile listings?

Current:

```
"profiles": {  
  "profile1": "https://acme.ca/docs#profile1",  
  "profile2": "a different profile"  
}
```

Proposal 3 (separate web and text docs):

```
"profiles": {  
  "profile1": {"doc": "https://acme.ca/docs#profile1"},  
  "profile2": {"desc": "a different profile"}  
}
```

Next Steps

- Implementation by and feedback from other server operators
- WGLC
