

# DIEM DNS Architecture I-D

IETF 125

# The Obvious Gaping Holes

- Discovery
  - How do clients find out which names to lookup in the DNS?
- The DIEM RRtype
  - We **really** need to start working on a definition: format, contents, etc
- Roles
  - Linking issuers and authorising entities to DNS admin roles & processes
  - Oversight and governance issues

# Fixed? in the next release?

- Will Secure DNS, encrypted transports, Oblivious DNS, etc be "good enough"?
  - If not, what/where are the alternatives?
- More detail on how DNS is/isn't applied to use cases
- When could a -01 version be ready for WG adoption?
- Co-authors wanted
  - Apply within!
