NOTE WELL

By participating in the IETF you agree to follow IETF processes and policies. This Note Well is a reminder of some of those policies. For a linked version of this text, please visit www.ietf.org/note-well or use the QR code below.

- IETF participants are expected to behave in a professional manner and extend respect and courtesy to their colleagues at all times (see *RFC 7154: IETF Guidelines for Conduct and IETF Anti-Harassment Policy*). If you have any concerns about behavior, please contact the *Ombudsteam* who have a duty of confidentiality and extensive powers to act, as set out in *RFC 7776: IETF Anti-Harassment Procedures*.
- If you are aware that any IETF contribution (as defined in *RFC 5378: Rights Contributors Provide to the IETF Trust*) is covered by patents or patent applications that are owned or controlled by you, your employer or your sponsor, you must disclose that fact, or not participate in the discussion (see *RFC 8179: Intellectual Property Rights in IETF Technology*).
- For detailed process information consult *RFC 2026: Internet Standards Process* and *RFC 2418: IETF Working Group Guidelines and Procedures* and updates to those.
- The IETF routinely makes public written, audio, video, and photographic records of IETF activities, including your personal information as set out in the *IETF Privacy Statement*.

For advice, please talk to Working Group chairs or Area Directors.

A Greeting from the Meeting Host

Mr. CHEN Kai

The background of the slide features several overlapping circles in various shades of blue, ranging from light to medium blue, creating a modern and abstract design.

CHEN Kai

Deputy Director

Bureau of Information and Telecommunication Administration
Ministry of Industry and Information Technology

Today, it is my great honor to be here in Shenzhen with global Internet experts for the IETF 125 meeting. First, I extend a sincere welcome to all guests and friends from afar. I warmly congratulate the successful hosting of this meeting and express my heartfelt thanks to our international friends who have long cared for and supported the development of China's Internet.

As a highly influential international organization in this field, the IETF has made irreplaceable contributions to core Internet protocols, architecture, and technical standards. You have laid a solid technical foundation for a prosperous global Internet, and we highly appreciate your work.

China upholds the spirit of openness, inclusiveness, and win-win cooperation. We are committed to open technological cooperation. We support Internet tech communities in deepening international exchanges, actively participating in global standard-setting, and promoting infrastructure connectivity.

We aim to build a peaceful, secure, open, cooperative, and orderly cyberspace, contributing to a global Internet that is sustainable and innovative.

Today, new technologies are constantly emerging. The deep integration of AI and the Internet brings both development opportunities and new challenges. We look forward to using this meeting as an opportunity to deeply discuss emerging technologies and innovative ideas. We also hope this event will drive practical cooperation among all parties, advancing the high-quality development of the global Internet industry. Let us join hands and break new ground. Together, we can build a community with a shared future in cyberspace, making technology a true force for good across the globe.

Finally, I wish you all a productive and pleasant stay in Shenzhen!

Bringing the next generation of participants and ideas to the IETF

The logo for ANRW 2026 features the letters 'ANRW' in a stylized font where each letter is composed of a network of orange dots connected by thin grey lines. To the right of 'ANRW' is the year '2026' in a large, orange-outlined sans-serif font. Below this, the full name 'Applied Networking Research Workshop' is written in a solid orange sans-serif font.

At IETF-126 in Vienna
Paper submission deadline 17 April 2026

Workshop chairs: Thomas Schmidt & Suresh Krishnan

The **Applied Networking Research Prize** recognises:

- the best recent results in applied networking
- interesting new research ideas of potential relevance to the Internet standards community
- and upcoming people that are likely to have an impact on Internet standards and technologies

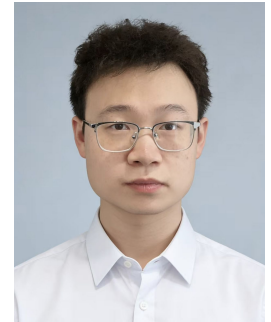

Two ANRP award talks at IRTFOPEN on Wednesday

Tianyi GAO for his work on transport-level encryption for datacenter networks.

Xiangjie HUANG for his work on sending burstiness control for high-quality real-time communication.

Papers and slides at <https://www.irtf.org/anrp/>

IRTFOPEN on Tuesday: Internetworking Challenges for AI

What are meaningful research challenges for the IRTF at the intersection of AI systems and internetworking?

- Beyond data centers – good linkage with Internet technologies
- Connected to ongoing research in academia

Disaggregated Architectures for Large Model Inference	Mingxing Zhang , Tsinghua University
Reliability Engineering Challenges in Networking for AI	Hong Xu , CUHK
On AI Agent Networking	Lixia Zhang , UCLA

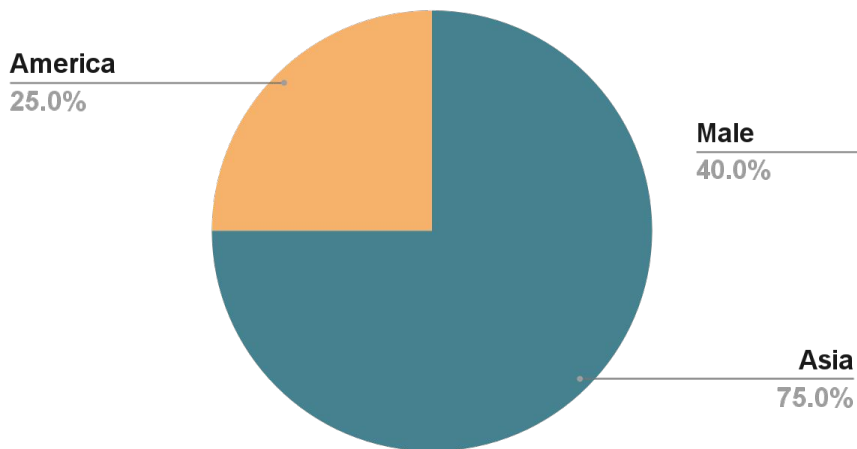

Identified topics:

- Testbeds and data sets for reproducible experiments
- System & protocol design for future distributed learning platform (KV-cache centric, unified abstractions)
- Principled agent communication (naming, identity, trust delegation, group communication)

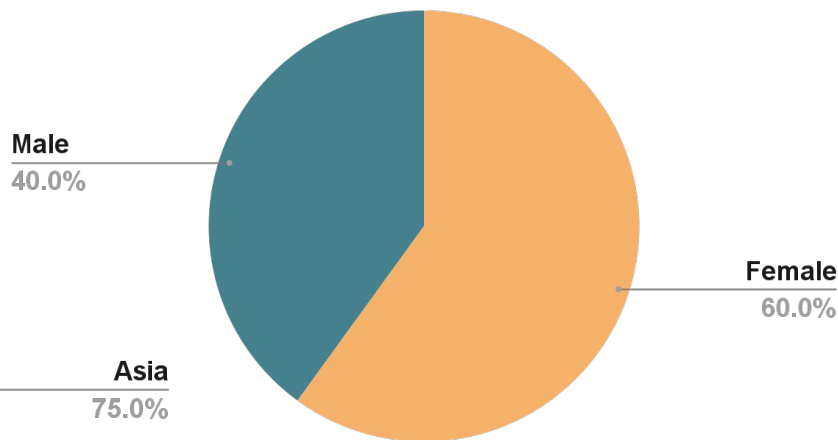

The IRTF is pleased to offer travel grants to support early career academics and PhD students from under-represented groups to attend the IRTF meetings co-located with the IETF

Diversity

- DEI training and review, like last year.
- Diversity with NomCom 2025-2026
 - No gender diversity improvement this cycle
 - Improved on regional diversity
 - Leadership pipeline: New selected members relatively new to leadership, and sometimes (relatively) young
- IETF is working toward a better balance, but there always room for improvement
 - Continuously improve processes

Lessons Learned 2025–2026

- Like last years, RFC 8713 failed on us when unanticipated circumstances arose
 - No documented process for handling exceptions
 - We made some processes up, which worked ...
- NomCom processes rely on the chair and on oral tradition
 - Some basic documentation (to start with) could help
 - ... including with some tasks taken up by the secretariat to support the chair
- Some tooling with voting to streamline the deliberation phase

Finally

- Thank you for the opportunity to be a NomCom chair
 - The IETF community was always supportive
 - The NomCom voting members were dedicated
 - The chairs advisor and liaisons helped with advice and process
- Volunteer for the next NomCom!
 - As I mentioned earlier, I found it a very insightful experience about the IETF, the people and its processes

TRUST AGREEMENT

THIS TRUST AGREEMENT (the “Agreement”) is made as of the 15th day of December, 2005, by CORPORATION FOR NATIONAL RESEARCH INITIATIVES, a District of Columbia non-profit corporation (“CNRI”), INTERNET SOCIETY, a District of Columbia non-profit corporation (“ISOC”), as Settlers, the INTERNET ENGINEERING TASK FORCE (“IETF”), and the INITIAL TRUSTEES as defined herein.

ARTICLE I. IDENTIFICATION OF TRUST

1.1 Name. The trust created by this Agreement shall be known as the “IETF Trust.”

ARTICLE II. PURPOSE OF TRUST

2.1 Purpose. The purposes for which the Trust is organized and operated are to engage exclusively in such charitable, educational, and scientific activities as may qualify it for exemption from federal income tax under Section 501(c)(3) of the Code (as defined below). Such purposes include, but are not limited to, the advancement of education and public interest by acquiring, holding, maintaining and licensing certain existing and future intellectual property and other property used in connection with the Internet standards process and its administration, for the advancement of the science and technology associated with the Internet and related technology.

IETF Trust intends to end operations in 2026

- Upon completion of IANA Agreement signatures
- Upon final transfer remaining assets
- Upon final legal & tax filings
