  - Mahesh Jethanandani
- Routing (RTG) AD
  - Gunter van der Velde
- Security (SEC) AD
  - Christopher Inacio
- Web and Internet Transport (WIT) AD
  - Gorry Fairhurst

Diversity

- DEI training and review, like last year.
- Diversity with NomCom 2025-2026
  - No gender diversity improvement this cycle
  - Improved on regional diversity
  - Leadership pipeline: New selected members relatively new to leadership, and sometimes (relatively) young
- IETF is working toward a better balance, but there always room for improvement
  - Continuously improve processes

Lessons Learned 2025–2026

- Like last years, RFC 8713 failed on us when unanticipated circumstances arose
  - No documented process for handling exceptions
  - We made some processes up, which worked …
- NomCom processes rely on the chair and on oral tradition
  - Some basic documentation (to start with) could help
  - … including with some tasks taken up by the secretariat to support the chair
- Some tooling with voting to streamline the deliberation phase

Finally

- Thank you for the opportunity to be a NomCom chair
  - The IETF community was always supportive
  - The NomCom voting members were dedicated
  - The chairs advisor and liaisons helped with advice and process

- Volunteer for the next NomCom!
  - As I mentioned earlier, I found it a very insightful experience about the IETF, the people and its processes
