Relation to IANABIS

IANABIS has three documents under consideration:

- RFC8126bis - basic assignment rules definitions
- RFC7120bis - early assignment
- draft-baber-ianabis-early-registries (not of concern here)

Some of these have added text we can depend on rather than have in our docs (like definition of “designated expert”.
Should the WG maximize dependency on these, or try for independence?
