

Ratchet tree options

draft-mahy-mls-ratchet-tree-options: how to send Ratchet Tree and GroupInfo

- Changes since -03
 - Added Security Considerations
 - Removed the `tree_signature` . It served no purpose as the `tree_hash` is used to verify integrity of the ratchet tree.
- We had a call for adoption on this document, which seemed positive. Russ pointed out the missing security considerations (now fixed).
- This is now implemented
