Same Entity Set Support for EPP

James Galvin, Michael Bauland

IETF125 - Shenzhen - REGEXT Working Group

17 March 2026

Agenda

- Summary review of changes since last version
- Discussion
- Requesting working group adoption

Summary of Changes

- Terminology from RFC5730 and RFC3375
  - Shared central repository
  - Based on objects - current examples are domain objects (used generically)
- Define same-entity principle
  - Registry defined equivalence
- Policy requirements
- New terms

Policy Requirements

- Policy specification is outside our scope
  - MUST specify certain operating elements
- Must be shared as appropriate
- Define equivalence
- Specify options as appropriate
  - Examples are present - neither required nor limiting
  - Prescribed if its value is determined immediately upon creation of the Primary Domain.
  - Settable if its value may be managed by the registrar.
  - Linked if the setting or unsetting of the option for any member of the Same Entity Set applies to all members of the set.

Terms

- Allocated Member
- Allocatable Member
- Activated Member
- Blocked domain
- Exempted domain
- Primary Domain
- Same Entity Principle
- Same Entity Set
- Status Value
