Jorge Rabadan (Nokia)

Alex. Nichol (Arista)

Quick Recap

- Clarifies MAC Mobility procedures with UMR
- Defines UMR interaction with EVPN L2 forwarding
- Defines UMR behavior for Symmetric IRB
- Defines Proxy ARP / ND processing
- Defines handling of Silent Hosts
- Clarifies UMR processing with zero and non-zero ESI
- Updates RFC9014

Cisco Confidential

Changes to 01st Version

- Editorial updates for RFC style
- Improved terminology consistency
- Clarified normative language (RFC2119/8174)
- Added explanatory text for operational procedures

Cisco Confidential

Document Status

- WG adopted draft
- Major technical issues resolved
- Editorial updates incorporated
- No known open technical issues
- It is already supported by multiple vendor

Cisco Confidential

Next Step

- Authors believe the document is ready for **Working Group Last Call**.
