Same Entity Set Support

James Galvin, Michael Bauland
IETF126 - Vienna
21 July 2026

Changes since IETF125

- Title change
  - Domain Variant Support to Same Entity Set Support
  - Purpose is to generalize the concept of “equivalent” domain names
- Editorial work to support title change
- Two new sections
  - Architectural Principles
  - Technical Principles
- Expanded text throughout
- Some XML Schema added

Next Steps

- Migrate to IETF GitHub
  - This document will be the basis of an experiment for REGEXT
  - Authors are GitHub novices so please bear with us
- Will use the issue tracker
- Section for analysis with related documents
- Check each command for completeness
- Propose appropriate new result codes
