Current Status

- ID is at -02

- www.nfsv4-editor.org

Moving Forward

- I-D is NFSv4.1 only

- Will that continue to be the goal?

- NFSv4.1 move to Draft with/without 4.0?

- How will RFC3530 be updated?

- Should there be a combined 4.0/4.1?

Implementation

- Still a requirement for moving 4.1 forward?

- Who is doing what and how/if to track?

- September next bakeathon?

- Close at that event or before?

Missing in -02 (major)

- Intro Section

- RPC/Security Flavors/Transports

- Move Sessions to RPC… section

- Migration/Replication/Namespace (Noveck)

- Re-write of lock_owner/open_owner use

Issues (day 2)

- pNFS commits with cluster file system

- utf8

- Sessions Mandatory (?)

- Same principal used throughout?

- HA-NFS solutions

concall/I-D schedule
