6in4 versus 6over4 terminology
draft-palet-v6ops-6in4-vs-6over4-01

Jordi Palet

jordi.palet@consulintel.es

The Problem

- Number of IETF docs use 6in4, 6over4, IPv6 in IPv4, IPv6 over IPv4, etc., in an "interchangeable" way
- However they are referring to different things
- As a consequence, vendor and operator documents get confused and confuse engineers and users
  - Things fail :-(

Changes from previous version

- The document only highlights the terminology differences to avoid this type of confusion

- No MUST, just a recommendation

Next Steps

- WG Item ?
