BCP for Updates to DHCP

Barr Hibbs

(presented by Ralph Droms)

BCP for Changes to DHCP

- "best practice" for any I-D involving changes to DHCP
  - requirement that I-D authors provide updated figures and tables
  - need illustrated by DHCPv4 Leasequery (RFC 4388); would have been improved by the inclusion of updated figures and tables replacing or augmenting those in RFC2131

- Next steps (mailing list):
  - Review purpose, scope, content
  - Advance and publish as Informational (?)
