

Spatial Composition Draft - 01

**Al Morton and
Emile Stephan, Editors
Lei Liang and many others
July 10, 2006**

Changes in 01

- Sync'd terminology with Framework
- Clarified that the Finite One-way Delay Metric is based on conditional sample
 - Conditioned on arrival w/ long waiting time
 - Adopted text similar to RFC 3393 describing the conditional delay distribution which is the basis for Delay Statistics (sample mean)
- Closed many open issues based on discussion at last session

Further Development

- Try (harder) to reduce redundancy in metric definitions
- Add Composed Metrics that are “more than Averages”
